

# Testing of First MileStone project - LKC

The following content is intended to prove that the Limerick Kettlebell Lifting Club website meets the original goals and fit for its intended purpose. We also aim to prove that the website is responsive and works on desktop and mobile devices as designed.

See document on Goals/Objectives/Needs/User Stories/Features [here](#).

See document on Page Structure [here](#).

## Background:

**Desktop** device is a desktop Windows 7 operating system running Chrome (on 1920x1080 pixels screen) and Firefox browser (on 1600x1200 pixels screen)

**Mobile** device is a OnePlus2 mobile phone running OxigenOS 3.6.1 (eq. Android 6.0.1) and Chrome Mobile browser on screen resolution 1080x1920 pixels

## User Story 4

As a website visitor with intent on joining my first training with the club, I want to announce my arrival, so they know my name, my background and they will expect me.

**Scenario:** visitor is interested in joining a training session

And may provides a valid email address OR may not

And provides a personal message

**Given** visitor is on the TryOut page

**When** scrolls to the HeadsUp section to the form with 3 fields and Send button

And enters something into "Your name" field

And enters a valid email address into "Your email" field OR leaves it empty

And enters something into "Tell us about yourself" field

And clicks on the Send button

**Then** the form is sent

And new page opens in a separate browser tab with a table of two columns of sent data: ("Input Name", "Value")

And there is a table row with values (applicantname, <entered value of "Your name" field>)

And there is a table row with values (applicantemail, <entered value of "Your email" field> OR empty)

And there is a table row with values (applicantstory, <entered value of "Tell us about yourself" field>)

Test #	Pre-condition	Event	Result	Comment
		Expected		
1	on Desktop Chrome,	- scroll to the section <b>Heads Up!</b> - enter Visitor into form field <b>Your name</b> , - enter visitor@gmail.com into field <b>Your email</b> - enter hello into field <b>Tell us about yourself</b> - click on button <b>Send</b>	pass	-
	TryOut page is open	new page opens in a separate browser tab with a table of <b>Input Name      Value</b> applicantname    Visitor applicantemail   visitor@gmail.com applicantstory   hello		
2	on Mobile Chrome,	- scroll to the section <b>Heads Up!</b> - enter Visitor into form field <b>Your name</b> , - leave empty <b>Your email</b> - enter hello into field <b>Tell us about yourself</b> - click on button <b>Send</b>	pass	-
	TryOut page is open	new page opens in a separate browser tab with a table of		

		<u>Input Name</u> <u>Value</u> applicantname    Visitor applicantemail applicantstory   hello		
3	on Mobile,  TryOut page is open	- scroll to the section <b>Heads Up!</b> - enter Visitor into form field <b>Your name</b> , - enter visitor@gmail.com into field <b>Your email</b> - enter hello into field <b>Tell us about yourself</b> - click on button <b>Send</b>	pass	-
		new page opens in a separate browser tab with a table of <u>Input Name</u> <u>Value</u> applicantname    Visitor applicantemail    visitor@gmail.com applicantstory    hello		
4	on Desktop Firefox,  TryOut page is open	- scroll to the section <b>Heads Up!</b> - enter Visitor into form field <b>Your name</b> , - leave empty <b>Your email</b> - enter hello into field <b>Tell us about yourself</b> - click on button <b>Send</b>	pass	-
		new page opens in a separate browser tab with a table of <u>Input Name</u> <u>Value</u> applicantname    Visitor applicantemail applicantstory   hello		

**Scenario:** visitor is interested in joining a training session

**Given** visitor is on the TryOut page

**When** scrolls to the HeadsUp section

And clicks on the Send button

**Then** the form is not sent

And an error message is presented about "Your name" field is mandatory

Test #	Pre-condition	Event	Result	Comment
		Expected		
5	on Desktop Chrome,  TryOut page is open	- scroll to the section <b>Heads Up!</b> - click on button <b>Send</b>	pass	-
		error message on input field <b>Your name</b> : Please fill out this field		

**Scenario:** visitor is interested in joining a training session,

And provides a name,

And does not provide a personal message

**Given** visitor is on the TryOut page

**When** scrolls to the HeadsUp section

And enters something into "Your name" field

And clicks on the Send button

**Then** the form is not sent

And an error message is presented about "Tell us about yourself" field is mandatory

Test #	Pre-condition	Event	Result	Comment
		Expected		

6	on Mobile,  TryOut page is open	- scroll to the section <b>Heads Up!</b> - enter Visitor into form field <b>Your name</b> , - click on button <b>Send</b>	pass	-
		error message on input field <b>Tell us about yourself</b> : Please fill out this field		

**Scenario:** visitor is interested in joining a training session

And provides a name,

And provides invalid email address

**Given** visitor is on the TryOut page

**When** scrolls to the HeadsUp section

And enters something into "Your name" field

And enters an invalid email address into "Your email" field

And clicks on the Send button

**Then** the form is not sent

And an error message is presented about "Your email" field contains an invalid value

Test #	Pre-condition	Event	Result	Comment
		Expected		
7	on Desktop Firefox,  TryOut page is open	- scroll to the section <b>Heads Up!</b> - enter Visitor into form field <b>Your name</b> , - enter gmail.com into field <b>Your email</b> - enter hello into field <b>Tell us about yourself</b> - click on button <b>Send</b>	pass	-
		error message on input field <b>Your email</b> : Invalid email address		

**Scenario:** visitor calls the club

**Given** visitor is on the Home page

**When** scrolls to the bottom of the page

And clicks on the Phone icon inside of the footer

**Then** the browser's "tel:" protocol is triggered with given contact number

Test #	Pre-condition	Event	Result	Comment
		Expected		
8	on Desktop Chrome,  Home page is open	- scroll to the bottom of the page - click on the phone icon on the footer	pass	-
		the default phone client is triggered with prefilled phone number		

9	on Mobile,	- scroll to the bottom of the page - click on the phone icon on the footer	pass	first test failed, corrected code from <code>href="callto:..."</code> to <code>href="tel:..."</code>
	Home page is open	the phone dials the prefilled phone number		

**Scenario:** visitor emails the club

**Given** visitor is on the Home page

**When** scrolls to the bottom of the page

And clicks on the Mail icon inside of the footer

**Then** the browser's "mailto" protocol is triggered

Test #	Pre-condition	Event	Result	Comment
		Expected		
10	on Desktop Firefox,  Home page is open	- scroll to the bottom of the page - click on the mail icon on the footer	pass	-
		the default email program is triggered with prefilled To: email address		

11	on Mobile,  Home page is open	- scroll to the bottom of the page - click on the mail icon on the footer	pass	-
		the default email app is triggered with prefilled To: email address		

**Scenario:** visitor visits the club's facebook page

**Given** visitor is on the Home page

**When** scrolls to the bottom of the page

And clicks on the "f" letter icon inside of the footer

**Then** the club's facebook page opens in a new browser tab

Test #	Pre-condition	Event	Result	Comment
		Expected		
12	on Desktop Chrome,  Home page is open	- scroll to the bottom of the page - click on the "f" letter icon on the footer	pass	-
		the club's facebook page loads into a new tab in the browser		

13	on Mobile,  Home page is open	- scroll to the bottom of the page - click on the "f" letter icon on the footer	pass	-
		the club's facebook page loads into a new tab in the browser		

## User Story 3

As a website visitor with intent of starting training, I want to access all relevant information on one website about kettlebell training with the club so I could join training without raising any further questions.

**Scenario:** a visitor arrives to the website

**Given** a visitor

**When** lands on the page

**Then** sees a blurry background picture depicting a training session

And sees some text promising exceptional training and community experience

And sees a navigation bar or a collapsed navigation bar

And sees a JoinUs button at the middle of the screen

And sees an indication that there is more content on the landing page

Test #	Pre-condition	Event	Result	Comment
		Expected		
14	on Desktop Chrome	- type https://ruszkipista.github.io/cims01-lkc/ into the browser's address bar	pass	-
		the club's website loads into the current tab in the browser, visible features: address bar, blurry background picture, title in the upper third section, JoinUs button in the middle third section, an other title in the lower third section, the background image does not cover the bottom of the page, but reveals there is a next section on the page		

15	on Desktop Firefox	- type https://ruszkipista.github.io/cims01-lkc/ into the browser's address bar	pass	-
		the club's website loads into the current tab in the browser, visible features: address bar, blurry background picture, title in the upper third section, JoinUs button in the middle third section, an other title in the lower third section, the background image does not cover the bottom of the page, but reveals there is a next section on the page		

16	on Mobile	- type https://ruszkipista.github.io/cims01-lkc/ into the browser's address bar	pass	-
		the club's website loads into the current tab in the browser, visible features: address bar, blurry background picture, title in the upper third section, JoinUs button in the middle third section, an other title in the lower third section, the background image does not cover the bottom of the page, but reveals there is a next section on the page		

**Scenario:** a visitor discovers the the full length of the landing page by scrolling

**Given** a visitor

And landed on the website

**When** scrolls downwards

**Then** visitor sees a section with content answering the questions of what, how, why, who

And sees a section with content what others say about kettlebell training

And sees a section with content answering the questions of when, fee, where, contact

And sees a footer offering ways to contact the club

Test #	Pre-condition	Event	Result	Comment
		Expected		
17	on Desktop Chrome, Home with top of the page is open	- scroll downwards on the page until the end is reached	pass	-
		scrolling through the following sections: - What, How, Why, Who - Others say with 4 quotes - When, Fee, Contact, Where - Footer with Phone, Mail, "f" letter icons		

18	on	- scroll downwards on the page until the end is reached	pass	-
----	----	---	------	---

	Desktop Firefox,  Home with top of the page is open	scrolling through the following sections: - What, How, Why, Who - Others say with 4 quotes - When, Fee, Contact, Where - Footer with Phone, Mail, "f" letter icons		
--	--	--	--	--

19	on Mobile,	- scroll downwards on the page until the end is reached	pass	-
	Home with top of the page is open	scrolling through the following sections: - What, How, Why, Who - Others say with 4 quotes - When, Fee, Contact, Where - Footer with Phone, Mail, "f" letter icons		

**Scenario:** visitor uses navbar on any page to reach Home page

**Given** visitor is on any of the Home / About / Safety / Mission / Constitution / TryOut page

**When** clicks on the LKC logo or on text "Limerick Kettlebell Club" or on "Home" in the navbar

**Then** the top of the Home page loads into the screen

Test #	Pre- condition	Event	Result	Comment
		Expected		
20 - 73	on Desktop Chrome / Desktop Firefox / Mobile  on page Home / About / Safety / Mission / Constitution / TryOut	- on Mobile click on navbar toggler button - in the navbar click on LKC logo / text "Limerick Kettlebell Club" / "Home"	all pass	-
		the top of the Home page loads into the current browser tab		

**Scenario:** visitor uses navbar on any page to reach About page

**Given** visitor is on any of the Home / About / Safety / Mission / Constitution / TryOut page

**When** clicks on the About text inside the navbar

**Then** the top of the About page loads into the screen

Test #	Pre- condition	Event	Result	Comment
		Expected		
74 - 91	on Desktop Chrome / Desktop Firefox / Mobile  on page Home / About / Safety / Mission / Constitution / TryOut	- on Mobile click on navbar toggler button - in the navbar click on "About"	all pass	-
		the top of the About page loads into the current browser tab		

**Scenario:** visitor uses navbar on any page to reach Contact details

**Given** visitor is on any of the Home / About / Safety / Mission / Constitution / TryOut page

**When** clicks on the Contact text inside the navbar

**Then** the About page loads into the screen positioned to the Contact section

Test #	Pre- condition	Event	Result	Comment
--------	----------------	-------	--------	---------

		Expected		
92 - 109	on Desktop Chrome / Desktop Firefox / Mobile  on page Home / About / Safety / Mission / Constitution / TryOut	- on Mobile click on navbar toggler button - in the navbar click on "Contact"  the Contact section of the About page loads into the current browser tab	all pass	-

**Scenario:** visitor uses navbar on any page to reach Safety/Mission/Constitution page

**Given** visitor is on any of the Home / About / Safety / Mission / Constitution / TryOut page

**When** clicks on "Documents" inside the navbar

And further clicks on Safety/Mission/Constitution text on the revealed list under "Documents"

**Then** the top of the Safety/Mission/Constitution page loads into the screen

Test #	Pre- condition	Event	Result	Comment
		Expected		
110 - 163	on Desktop Chrome / Desktop Firefox / Mobile  on page Home / About / Safety / Mission / Constitution / TryOut	- on Mobile click on navbar toggler button - in the navbar click on "Safety 101" / "Mission Statement" / "Constitution"  the top of Safety / Mission / Constitution page loads into the current browser tab	all pass	-

**Scenario:** visitor uses navbar on any page to reach TryOut page

**Given** visitor is on any of the Home / About / Safety / Mission / Constitution page

**When** clicks on the Try Out button inside the navbar

**Then** the top of the TryOut page loads into the screen

Test #	Pre- condition	Event	Result	Comment
		Expected		
164 - 178	on Desktop Chrome / Desktop Firefox / Mobile  on page Home / About / Safety / Mission / Constitution	- on Mobile click on navbar toggler button - in the navbar click on button "Try Out"  the top of TryOut page loads into the current browser tab	all pass	-

**Scenario:** visitor uses navbar to check out the meaning of any of 2 logos on the navbar

**Given** visitor is on any of the Home / About / Safety / Mission / Constitution / TryOut page

**When** clicks on any of the greenish or white logos on the navbar

**Then** the About page loads into the screen positioned to either the AIKLF or UIKL section

Test #	Pre- condition	Event	Result	Comment
		Expected		
179 - 214	on Desktop Chrome / Desktop Firefox / Mobile  on page Home / About / Safety / Mission / Constitution / TryOut	- on Mobile click on navbar toggler button - in the navbar click on greenish / white logo  the AIKLF / UIKL section of About page loads into the current browser tab	all pass	-

**Scenario:** visitor clicks on the JoinUs button

**Given** visitor is on any of the Home page

And the JoinUs button is visible on the screen

**When** clicks on the JoinUs button

**Then** the top of the TryOut page loads into the screen

Test #	Pre- condition	Event	Result	Comment
		Expected		
215 - 217	on Desktop Chrome / Desktop Firefox / Mobile on Top section of Home page	- click on the button "Join Us!" the top of TryOut page loads into the current browser tab	all pass	-

**Scenario:** visitor wants to learn more about offered topics

**Given** visitor is on the Home page

**When** clicks on any of the "...read more" links at (What, How, Why, Who, When, Fee, Where) sections

**Then** the About page loads into the screen positioned to the corresponding (What, How, Why, Who, When, Fee, Where) section

Test #	Pre- condition	Event	Result	Comment
		Expected		
218 - 238	on Desktop Chrome / Desktop Firefox / Mobile on Home page	- scroll to the What / How / Why / Who / When / Fee / Where section - click on the "...read more" link the What / How / Why / Who / When / Fee / Where section of About page loads into the current browser tab	all pass	-

## User Story 1

As a club coach I want to make available all information that I think needs to be known before a new joiner enters the gym, so I can spare time on explaining things on the first occasion or in emails.

**The tests of User Story 3 covers this.**

## User Story 2

As a club coach I want to make available a Fitness Self Assessment form to receive it filled from the joiner, so I can train the new joiner more on the first occasion.

**Scenario:** visitor uses navbar on any page to download Fitness Health Self Assessment form

**Given** visitor is on any of the Home / About / Safety / Mission / Constitution / TryOut page

**When** clicks on the Self Assessment text inside the navbar

**Then** the file FitnessHealthAssessment.pdf gets downloaded via the browser

Test #	Pre- condition	Event	Result	Comment
		Expected		
239 - 256	on Desktop Chrome / Desktop Firefox / Mobile on page Home / About / Safety	- on Mobile click on navbar toggler button - in the navbar click on "Self Assessment"	all pass	-

	/ Mission / Constitution / TryOut	FitnessHealthAssessment.pdf gets downloaded via the browser		
--	-----------------------------------	---	--	--

## User Story 5

As a club member I want to access news articles about upcoming and past club related events, so I can be well informed

**Not implemented yet**

## User Story 6

As a club officer I want to make club governance documents available to the public so they are accessible by anyone and any time without extra effort by the club.

**The tests of User Story 3 covers this, especially the access to the Constitution / Mission pages**

## User Story 7

As a club officer I want to make clear the club's national and international affiliation so new joiners can expect quality training.

**The tests of User Story 3 covers this, especially test number 179-214**
